

## **Building Automation & HVAC Controls Specialists**

**Electrical Installations, Maintenance, Controls Product Sales  
& Energy Efficiency Solutions**

## About Us

**BAE Automation** is the only independent, full service building automation and mechanical electrical services company in Western Victoria. Established 1996 in Colac; the company has grown based on quality workmanship and deployment of leading edge automation technologies.

Now located in a larger office/warehouse in North Geelong and with staff located throughout the region; we are more than ever, dedicated to serving the West Victorian community with world class technologies that make buildings more comfortable, safe and energy efficient.

## Our Services

At **BAE Automation**, we offer a "one stop" service for comprehensive design, installation, system integration, product supply and maintenance for commercial buildings. From a full turn-key building automation installation to just purchasing an air conditioning thermostat - **No job is too big or too small.**

- Building Automation
- Electrical Contracting
- Retrofits and system integration
- Maintenance & Repairs
- Air Conditioning Controls
- Mechanical Services Switchboards
- Control Panels
- Lighting Control
- Energy Saving Solutions
- HVAC Product Sales

**BAE Automation** now offers a HVAC product trade sales service and has access to most of the major building automation and HVAC control products brands. Many of the common items you need are in stock such as thermostats, sensors, damper actuators and control valves. If not in stock then we can get it fast. We deliver or come see our new showroom and test bench facility.

## Our Technologies

At **BAE Automation** we pride ourselves on being an independent service and product provider; we are not an exclusive agent for a manufacturer or tied to a single building automation platform. We select the product that best fits our clients' needs and budget. Our technologies are "open" and based on industry standards such as BACnet, Modbus, KNX and the Niagara platform.

Technology alone is not enough. Our staff have years of experience in the HVAC field and also have extensive ongoing product training to make sure optimal results are achieved for our clients.

**BAE** has carefully selected its suppliers and partners to ensure your system or product is world class quality. Brands you can trust include:

## Our Clients

Contractors in the air conditioning and mechanical services industry often need specialist electrical and building automation support. At **BAE Automation** we have the knowledge and professionals to ensure that all jobs get done the right way and in the right timeframe. From project quotation stage to installation and ongoing maintenance - we can provide the total solution. Or if it's just a product you need; we can help you. It's your choice.

Our building clients are located throughout Western Victoria and rely on **BAE Automation** for maintenance, repair, retrofit and energy efficiency technologies. We service all industries including:

- Hospitals
- Government buildings
- Universities
- Schools
- Entertainment facilities
- Commercial buildings
- Hotels/Accommodation
- Office complex
- Industrial facilities
